About Us

Pittwater Outrigger Racing Canoe Club (www.pittwateroutriggers.com) is located in the picturesque Northern Beaches suburb of Bayview, New South Wales, Australia.

The club was founded in 1995 and until January 1997 boasted only 6 female members, though the size of the club did not seem to hamper early success, and the club grew both in numbers and stature.

As of August 2010 the club has close to 60 active members. We cater for the ultra-competitive, to the paddler that wants to mix getting fit with some fun.

As well as competing in OC6 Regattas, we have a number of members who regularly train and race OC1 and OC2.

We have grown to become competitive on a state and national basis. Our overall results are a positive indication of the hard work, commitment and resolve of the club members.

Corporate Days and Team Building

Looking for something different and exciting to try for your next Corporate Day or Team Building exercise? Get involved in a dynamic team building opportunity involving outrigger canoeing.

WHY OUTRIGGER CANOEING?

It is held outdoors on the beautiful waters in Pittwater, a spectacular part of northern Sydney and for the simple fact that no paddling experience is required. Outrigging caters for all age groups and levels of fitness. It requires teamwork to paddle 160Kgs of fibreglass over a 150–250m distance, or longer.

Participants will experience the thrill of being involved in their own mini regatta. They will feel the excitement of competition, social interaction and team spirit.

THE EVENT

Members of Pittwater Outrigger Racing Canoe Club will organise the event including instruction, paddling and some fun races. Experienced steerers will be provided for each boat as well as other paddlers for instruction and assistance. Other activities such as scavenger hunts can be incorporated into the day.

TEAM COMPOSITION

Each canoe holds five paddlers and a steerer. You can arrange crews to have department versus department, Management versus Staff or combine people into new working teams. Either way, crews need to work together to get the best results and a well running canoe.
